Research papers

- Dušan Šimčák, Tibor Kvačkaj, Róbert Kočiško, Róbert Bidulský, Ján Kepič, Viktor Puchý*
Evaluation of high purity aluminium after asymmetric rolling at ambient and cryogenic temperatures 99
- Andrea Di Schino, Maria Richetta*
Effect of micro-alloying on quenching behaviour of steels for back-up rolls 105
- Andrea Di Schino, Maria Richetta*
Evaluation of the metallurgical parameters effect on tensile properties in austenitic stainless steels 111
- Alexey Ovchinnikov, Svetlana Skvortsova, Andrey Mamonov, Eugene Yermakov*
Influence of hydrogen on plastic flow of the titanium and its alloys 122
- Shijing Lu, Kunxia Wei, yan Wang, Jing Hu*
Effect of thermal oxidation on the corrosion resistance OF CP-Ti 135
- Pavel Salvetr, Andrea Školáková, Jaromír Kopeček, Pavel Novák*
Properties of Ni-Ti-X shape memory alloys produced by arc re-melting 141
- Daniel Kajánek, Branislav Hadzima, Filip Pastorek, Martina Neslušán Jacková*
Corrosion behaviour of DCPD coating ON ZW3 magnesium alloy prepared by LASV method 147
- Ines Hamdi, Zakaria Boumerzoug, Foued Chabane*
Study of precipitation kinetics of an Al-Mg-Si alloy using differential scanning calorimetry 155
- Anton Golodnov, Anastasia Golodnova, Natalia Burlakova, Alexey Elantsev*
Application of mathematical modeling for the unification of the production of metallurgical enterprises on the example of tubing 161
- Kenneth Kanayo Alaneme, Oluwadamilola Abigail Ajibuwa, Ifedolapo Elizabeth Kolawole, Adetomilola Victoria Fajemisin*
Mechanical, corrosion and wear behaviour of steel chips and graphite reinforced Zn-27Al alloy based composites 171

Technical paper

Daniela Kalincová, Miroslava Ťavodová, Helena Čierna, Pavel Beňo

Analysis of the causes of distortion castings after heat treatment

182

Letter to Editor

Vladimír Vodzinský

**The limits of pragmatism in education and training
as a factor influencing the quality of life**

193
