Research papers

- Giuseppe Napoli, Giulia Fabrizi, Riccardo Rufini,
Sabrina Mengaroni, Andrea Di Schino*
**Effect of quenching and tempering process on a medium C steel
with low chromium and molybdenum addition for forged components** 112
- Dagmar Bublíková, Štěpán Jeníček, Mihal Peković, Hana Jirková*
New treatment route for closed-die forgings of steels with 2.5% manganese 119
- Kateřina Rubešová, Ivan Vorel, Hana Jirková, Štěpán Jeníček*
Effects of Q&P process parameters on properties of 42SiCr steel 126
- Masoud Sehri, Hamid Ghayour, Kamran Amini, Masaab Naseri,
Habib Rastegari, Vahid Javaeri*
**Effects of cryogenic treatment on microstructure and wear
resistance of Fe-0.35C-6.3Cr martensitic steel** 134
- Paolo Ferro, Jan-Olof Nilsson, Franco Bonollo*
Corrosion resistance of UNS S31803 stainless steel welded joints 147
- Arkady Finkelstein, Dmitry Husnullin*
Irreversible thermal expansion of replicated aluminium foam 156
- Yazid Helal, Zakaria Boumerzoug*
**PIN diameter effect on microstructure and mechanical
properties of dissimilar friction stir lap welding aluminum
alloy 6061-T6 to dual phase steel** 163
- Anna Knaislová, Pavel Novák, Filip Průša, Sławomir Cygan, Lucyna Jaworska*
Preparation of TiAl15Si15 alloy by high pressure spark plasma sintering 174
- Pavel Salvetr, Andrea Školáková, Pavel Novák, Dalibor Vojtěch*
Phase formation in NiTiAl10 powder mixture during heating to 1100 °C 181

Technical paper

- David Hradil, Michal Duchek, Taťána Hrbáčková, Aleksander Ciski*
Gas nitriding with deep cryogenic treatment of high-speed steel 187
