<b>Scientific papers</b>	
<i>Pavel Novák, Jan Kříž, Alena Michalcová, Dalibor Vojtěch</i> <b>Effect of alloying elements on properties of PM Ti-Al-Si alloys</b>	<b>240</b>
<i>Beata Oleksiak, Leszek Blacha, Grzegorz Siwiec, Piotr Folęga</i> <b>Aluminium loos in the process of Ti-6Al-7Nb smelting</b>	<b>247</b>
<i>Mária Mihaliková, Lubomír Ambriško, Miroslav Némét</i> <b>Deformation behaviour analysis of polystyrene KRASTEN171 with montmorillonite nanofillers</b>	<b>254</b>
<i>Grażyna Rzyńska</i> <b>Fracture phenomenon in simulation of bimetallic rods extrusion process</b>	<b>261</b>
<i>Ilaria Forno, Marco Actis Grande</i> <b>Influence of geometry and cooling rate on properties of sinter-hardened steels</b>	<b>271</b>
<i>Dušan Rodziňák, Jozef Čerňan, Rudolf Zahradníček</i> <b>Effect of laser hardening on the properties OF PM steels</b>	<b>282</b>
<i>Kenneth K. Alaneme, Ayoola A. Sulaimon, Peter A. Olubambi</i> <b>Mechanical and corrosion behaviour of iron modified Cu-Zn-Al alloys</b>	<b>292</b>
<i>Neset Izairi, Fadil Ajredini, Mimoza Ristova, Afërdita Vevecka-Priftaj</i> <b>Micro-hardness evolution of Al-alloy AA 3004, processed by equal channel angular pressing</b>	<b>302</b>
<b>Rewievers in year 2013</b>	<b>310</b>
