

## Research papers

<i>Pavĺina Pustějovská, Simona Jursová</i> <b>Research on high temperature properties of iron ore materials</b>	135
<i>Marek Warzecha</i> <b>Numerical modeling of steel flow in a multi-strand continuous casting tundish</b>	140
<i>Zdzisław Kudliński, Krystian Janiszewski</i> <b>Macroscopic investigations of the primary structure of continuous casting ingots</b>	146
<i>Albert Smalcerz, Jakub Wieczorek, Maria Slezok</i> <b>Mathematical modeling of surface induction heating</b>	152
<i>Emil Spišák, Janka Majerníková, Miroslav Gombár, Alena Vagaská, Ján Kmec, Feliks Stachowicz</i> <b>Experimental study of the physical factors' influence on microhardness of AAO layers generated on material's AW-1050A</b>	160
<i>Janette Brezinová, Anna Guzanová, Pavlo Maruschak, Denisa Lorincová</i> <b>Study of wear processes of weld clads</b>	167
<i>Saravanan Varatharaju, Thyla Pudukarai Ramaswamy, Balakrishnan Sreedhara Rajarathnam</i> <b>The abrasive wear behavior of cenosphere-aluminium metal matrix composite</b>	177
<i>Emil Evin, Miroslav Tomáš, Mária Kollárová, Bogdan Antoszewski</i> <b>Some tribological aspects of Fe-Zn coated steel sheets at stamping processes</b>	189
<i>Filip Pastorek, Branislav Hadzima, Miroslav Omasta, Mansour Mhaede</i> <b>Effect of electrodeposition temperature on corrosion resistance of calcium phosphate</b>	200
<i>Petra Lacková, Mária Hagarová, Jana Cervová, Ilija Mamuzić</i> <b>Corrosion properties of selected aluminium alloys in model electrolytes</b>	209
<i>Tereza Hájková, Martina Hejdová, Andrea Kalendová</i> <b>Anticorrosion properties of perovskites surface-modified with conducting polymers in alkyde coatings</b>	217
<i>Michaela Štamborská, Monika Losertová, Vratislav Mareš, Lukáš Horsák</i> <b>Stress analysis in cylindrical specimens made from 34CrMo4 using DIC</b>	229
<i>Ján Slota, Miroslav Jurčišin, Lucian Lazarescu</i> <b>Influence of technological parameters on the springback angle of high-strength steels</b>	236
<i>Ladislav Lazić, Željko Grubišić, Martina Lovrenić-Jugović</i> <b>The impact of the height of rotating-hearth furnace workspace on fuel consumption</b>	244
